Subject: Update on the Lane Plating Superfund Site.

Paul, Joseph, and Bret,

You can see the work done on the fence at Lane Plating in the email below. The fence and sign should be done by next Wednesday.

I submitted all the documents to amend the task order so we can start phase 2 of the remedial investigation. The revised task order was issued this morning. Phase 2 will include another round of sampling, the human health risk assessment, the ecological risk assessment, and the Remedial Investigation (RI) report. The goal is to finish the RI before August 2020 when we transition to a new contract system. The Feasibility study (FS) will have to be done under the new system. The FS will evaluate the alternatives for remediating the Site. The FS should take about 1 year after we get funding. After this the EPA will present the Proposed Plan with our recommended remedy to the community. After that we will issue a Record of Decision (ROD) that identifies the selected remedy. In general things are going well considering we have only been working on the Site for about a year.

We have some preliminary data from the sampling that was done in May. It is incomplete and not well organized at this point, so we are waiting till we get validated data and a data report before we release this. We will post this on our website when the document is final.

Work on the CAG was delayed by the runoff election for Dallas city council. Ed and the contractor who will serve as a moderator would like to start meeting with community groups to set up the CAG. The preliminary date for the meeting to establish the CAG is the week of July 22. We were planning a community meeting in late July to present data from phase one sampling. The preliminary date for that meeting is now the week of August 5. We will let you know when we have more information.

We are moving to our new building this Friday. Our address and mail codes will change. The new address and mail code is in my signature block below.

Kenneth Shewmake

Subject: Re: Update on fence at Lane Plating?

Do you have access to the WAR?

I provided an update there.

Fence posts on north side almost done being placed. Fence contractors should be able to finish placing the posts on the east and south side today. We're hoping that they can finish by Friday.

I have a meeting with John Meyer tomorrow to talk about community involvement issues at Lane Plating and I wanted to get an update on work on the fence. Is it done or are they still working on it? Do you have any pictures?

Also, I need to get the keys back when you're done.
